
nucleardatapy

Release 0.1

Jérôme Margueron, IRL NPA, USA

Jun 26, 2024

CONTENTS

1	Contents	3
1.1	Usage	3
1.2	Readme:	3
1.3	Complement	3
2	Indices and tables	7
	Python Module Index	9
	Index	11

nucleardatapy (/in short nudy/) is a Python library for nuclear physicists facilitating the access to theoretical or experimental nuclear data. It is specifically designed for equation of state practitioners interested in the modeling of neutron stars, and it offers *simple* and *intuitive* APIs.

Note: This project is under active development.

CONTENTS

1.1 Usage

1.1.1 Installation

To use nucleardatapy, first download the .zip file from the git repository:

```
(.venv) $ unzip nucleardatapy.zip
```

Then enter the new folder nucleardatapy:

```
(.venv) $ cd nucleardatapy
```

And finally launch the install script:

```
(.venv) $ bash install
```

1.2 Readme:

1.3 Complement

1.3.1 SetupMicro

class nucleardatapy.setup_micro.**SetupMicro**(*model='1998-VAR-AM-APR'*)

Instantiate the object with microscopic results chosen by the toolkit practitioner. This choice is defined in the variable *model*. If not defined, it is taken to be the APR equation of state by default.

...

model

The model to consider. Choose between: 1998-VAR-AM-APR (default), 2008-AFDMC-NM, ...

Type

str, optional

nm_den

A list with densities in neutron matter.

Type

list

sm_den

A list with densities in symmetric matter.

Type
list

nm_kfn

A list with neutron Fermi momentum in neutron matter.

Type
list

sm_kfn

A list with neutron Fermi momentum in symmetric matter.

Type
list

nm_e2a

A list with energy per particle in neutron matter.

Type
list

nm_e2a_err

A list with uncertainties for the energy per particle in neutron matter.

Type
list

sm_e2a

A list with energy per particle in symmetric matter.

Type
list

sm_e2a_err

A list with uncertainties for the energy per particle in symmetric matter.

Type
list

nm_gap

A list with pairing gap in neutron matter.

Type
list

sm_gap

A list with pairing gap in symmetric matter.

Type
list

nm_pre

A list with pressure in neutron matter.

Type
list

nm_pre_err

A list with uncertainties for the pressure in neutron matter.

Type

list

sm_pre

A list with pressure in symmetric matter.

Type

list

sm_pre_err

A list with uncertainties for the pressure in symmetric matter.

Type

list

print_outputs()

Print outputs on terminal's screen.

nucleardatapy.setup_micro.models_micro()

Returns a list with the name of the models available in this toolkit and print them all.

INDICES AND TABLES

- `genindex`
- `modindex`
- `search`

PYTHON MODULE INDEX

n

`nucleardatapy.setup_micro`, 3

INDEX

M

`model` (*nucleardatapy.setup_micro.SetupMicro* attribute), 3
